

Man GLG European Equity Alternative

Monthly Report as at 31 October 2017

MTD: 0.93 % **YTD:** 5.07 % **Annualised return since inception:** 2.88 % **Annualised volatility since inception:** 4.77 %

Fund Risks

Prior to investing in the Fund investors should carefully consider the risks associated with investing, investors should consider the following risks and where appropriate seek professional advice before investing: Market Risk, Counterparty Risk, Currency Risk, Liquidity, Financial Derivatives, Leverage, Emerging Markets and Single Region/Country. More details can be found in the Risk Glossary.

Fund Aims

The aim of the Man GLG European Equity Alternative (the 'Fund') is to provide investors with substantial returns with a focus on long and short investments in issuers that are either domiciled or that derive a substantial part of their revenues from within Europe, or whose securities are traded in a European market. Investment in Europe will, at all times, constitute the largest regional allocation of the Fund.

The value of your investment and the income from it may rise as well as fall and you may not get back the amount originally invested. Prior to making investments investors should read and consider the Fund's offering documents.

*Unless otherwise indicated, the performance data is based on the reporting share class of the Fund (shown in blue in the NAV table) and may be closed to new subscriptions. The performance data does not take account of the commissions and/or costs incurred on the issue and/or redemption of units. Past performance is not a reliable indicator of future results. Returns may increase or decrease as a result of currency fluctuations. Please refer to important information.

Man GLG European Equity Alternative

Commentary

October was another positive month for global equities as signs of strong economic growth improved market sentiment. In the United States, the September jobs report showed the unemployment rate falling further to a low of 4.2% as well as an uptick in wages. In the Eurozone, the PMI manufacturing reading rose to 58.6 in October. Meanwhile in the UK, inflation reached its highest level in five years, rising to 3%. As was widely expected, the European Central Bank announced this month that it would cut its monthly bond-buying program by half while extending its QE programme through September 2018 or longer if necessary. ECB President Draghi also signalled that interest rates would not be raised and would remain at current levels until the end of its QE programme. Last month also saw both the US Senate and Congress passed the 2018 budget resolution essentially setting the stage for the Republican Party to enact tax reforms. The third-quarter earnings season began with strong earnings results from IBM, Amazon, and Microsoft providing the markets with a boost.

The Fund ended the month up 0.93% net of fees, driven primarily by specific returns. Of the developed books within the Fund, all but 6 were positive. Contribution to Fund returns from the underlying books ranged from -0.19% to 0.50% with Centre Book, US Japan, and UK Core books performing best this month. US Japan benefited from long positions in Sumco Corp and Shin-Etsu Chemical as investors responded positively to Prime Minister Abe's election victory. Meanwhile, UK Core found success with names in its short book. Conversely, the Industrials and Mining books found the market environment challenging this month. The Industrials book struggled with its short positions, while Mining saw long positions in Freeport-McMoran and Thyssenkrup lose money this month.

In terms of risk, Barra volatility was lower at 3.14% at the end of October. Gross exposures were also lower at approximately 371% at the end of the month. Specific risk remains the dominant component of risk composition and spent most of the month around the 70-75% level.

¹ Represents the combined AUM of all share-classes in the Portfolio ² See prospectus for details. ³ Sharpe ratio is a measure of risk-adjusted performance that indicates the level of excess return per unit of risk. It is calculated using the risk-free rate in the appropriate currency over the period analysed. Where an investment has underperformed the risk-free rate, the Sharpe ratio will be negative. As the Sharpe ratio is an absolute measure of risk-adjusted return, negative Sharpe ratios can be misleading and are therefore shown as n/a. ⁴ The length is the peak-to-trough decline.

⁵ Past performance is not a reliable indicator of future results. Returns may increase or decrease as a result of currency fluctuations. ⁶ Performance Disclosures: The inception date of the Fund is 27 July 2011. The net returns are calculated net of management fees of 2% per annum and, as applicable, performance fees of 20% of the amount by which the Fund exceeds its relevant hurdle. Please note that some share classes may charge higher management fees. ⁷ When 12 months of performance data is unavailable for a calendar year, partial year to date is shown. ⁸ The organisations and/or financial instruments mentioned are for reference purposes only. The content of this material should not be construed as a recommendation for their purchase or sale. ⁹ This attribution refers to the core holdings of the Fund and therefore will not exactly correspond to individual share class returns as performance fees and other class specific fees are not included. ¹⁰ These are trading books contained within the fund ¹¹ Higher level equity exposures are calculated using M&A adjustments. ¹² As a percent of the gross exposure. ¹³ Market value may be different to gross exposure due to the use of derivatives in the fund. Only fully funded positions in the fund would have the same market value as exposure. Fixed Income exposure for an equity fund may include exposures to short maturity government bills for cash management purposes ¹⁴ The micro dollar market capitalisation is from 0 to \$500,000,000.00, the small dollar market capitalisation is from \$500,000,000.00 to \$2,500,000,000.00, the mid dollar market capitalisation is from \$2,500,000,000.00 to \$5,000,000,000.00, the large dollar market capitalisation is from \$5,000,000,000.00 to \$12,500,000,000.00 and the mega dollar market capitalisation is \$12,500,000,000 and above. ¹⁵ Historical simulated replay taking current positioning and applying it to the specified 10 business day period. The periods selected are exceptional and results do not reflect typical performance. ¹⁶ The share class in blue in the table above is the reporting share class for the Fund and may be closed to new subscriptions. Performance of other share classes shown may vary. Performance data is shown with income reinvested and does not take into account sales and redemption charges where such costs are applicable.

Risk Glossary

Market Risk: The Fund is subject to normal market fluctuations and the risks associated with investing in international securities markets and therefore the value of your investment and the income from it may rise as well as fall and you may not get back the amount originally invested.

Counterparty Risk: The Fund will be exposed to credit risk on counterparties with which it trades in relation to on-exchange traded instruments such as futures and options and where applicable, 'over-the-counter' ("OTC", "non-exchange") transactions. OTC instruments may also be less liquid and are not afforded the same protections that may apply to participants trading instruments on an organised exchange.

Currency Risk: The value of investments designated in another currency may rise and fall due to exchange rate fluctuations. Adverse movements in currency exchange rates may result in a decrease in return and a loss of capital. It may not be possible or practicable to successfully hedge against the currency risk exposure in all circumstances.

Liquidity: The Fund may make investments or hold trading positions in markets that are volatile and which may become illiquid. Timely and cost efficient sale of trading positions can be impaired by decreased trading volume and/or increased price volatility.

Man GLG European Equity Alternative

Financial Derivatives: The Fund will invest in financial derivative instruments ("FDI") (instruments whose prices are dependent on one or more underlying asset) to achieve its investment objective. The use of FDI involves additional risks such as high sensitivity to price movements of the asset on which it is based. The extensive use of FDI may significantly multiply the gains or losses.

Leverage: The Fund's use of FDI may result in increased leverage which may lead to significant losses.

Emerging Markets: The Fund may invest a significant proportion of its assets in securities with exposure to emerging markets which involve additional risks relating to matters such as the illiquidity of securities and the potentially volatile nature of markets not typically associated with investing in other more established economies or markets.

Single Region/Country: The Fund is a specialist country-specific or geographic regional Fund, the investment carries greater risk than a more internationally diversified portfolio.

Important Information

The Fund is a sub-fund of Man Funds VI PLC, domiciled in Ireland and registered with the Central Bank of Ireland. Full details of the Fund objectives, investment policy and risks are located in the Prospectus which is available with the Key Investor Information Document in English and in an official language of the jurisdictions in which the Fund is registered for public sale, together with the Report and Accounts of the UCITS. The Fund's documentation are available free of charge from the local information/paying agent, from authorised distributors and from www.man.com.

In order to fulfil the fund's objectives the Prospectus allows the manager the ability to invest principally in units of other collective investment schemes, bank deposits, derivatives contracts designed with the aim of gaining short term exposure to an underlying stock or index at a lower cost than owning the asset, or assets aiming to replicate a stock or debt securities index.

The value of an investment and any income derived from it can go down as well as up and investors may not get back their original amount invested. Alternative investments can involve significant additional risks.
